Premier Installation M/C Ltd

Dear Sirs

As a market leader in the supply of Hygiene Solutions to the Food, Beverage and Dairy industries, Diversey needs to be able to rely upon its suppliers to come up to the high standards that our customers expect of us.

For over 15 years now, Premier Installation M/C Ltd., has met that requirement year on year.

The quality of work supplied, whether standard pipe work systems for water or chemicals or the design and building of bespoke systems and equipment, has always come up to the specifications required by Diversey and its customers.

Diversey is pleased to have a company such as Premier Installation M/C as part of its sub-contracting team. Our trust in them to complete on time and in full with the minimum of site management by Diversey is well founded.

On larger projects requiring site work for 6-8 weeks, Diversey's project management time is greatly reduced due to the reliability and service supplied by Premier Installation M/C.

The overall services that Premier Installation M/C can provide for site work ranging through surveys, design, materials planning and execution including the provision of trained platform operators, allows Diversey to scope their entire project with them.
